

# Your cosmic address

Fill in every line, from your own name all the way out to the edge of what anyone can see. The last six lines are the same for every child on Earth.

TO:

My name \_\_\_\_\_

House number \_\_\_\_\_

Street \_\_\_\_\_

Town or city \_\_\_\_\_

Country \_\_\_\_\_

-----

Planet \_\_\_\_\_

Star system \_\_\_\_\_

Galaxy arm \_\_\_\_\_

Galaxy \_\_\_\_\_

Galaxy group \_\_\_\_\_

The biggest one of all \_\_\_\_\_

## Word bank for the last six lines

Earth

The Solar System

The Orion Arm

The Milky Way

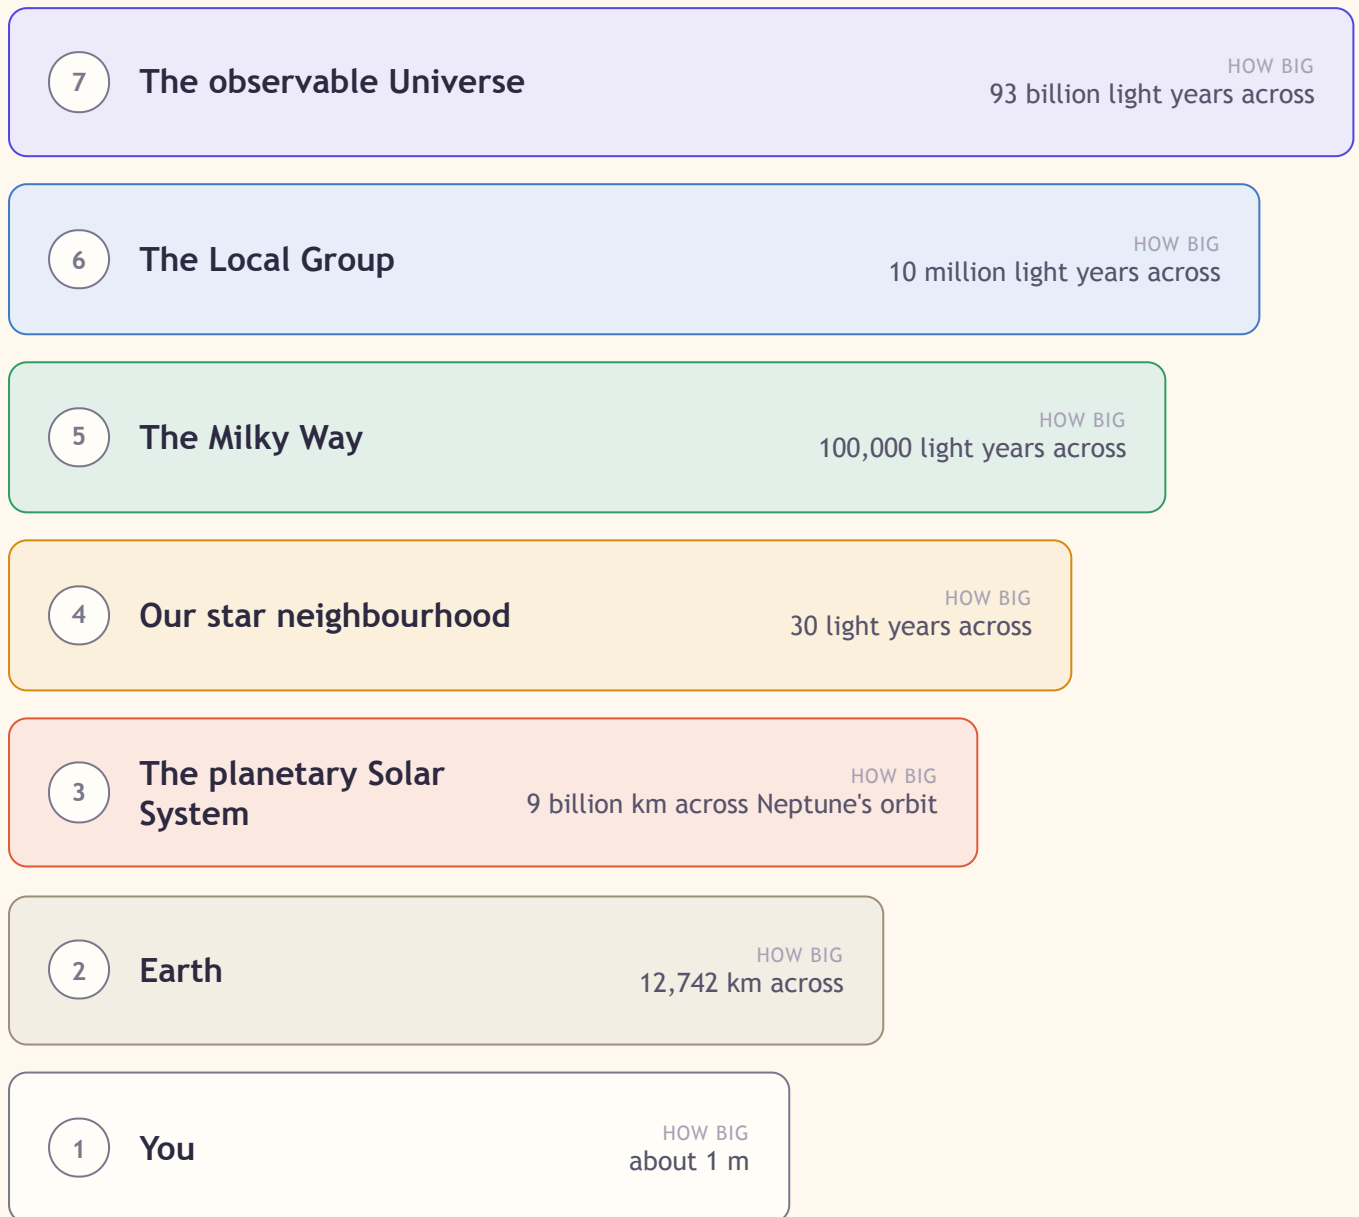

The Local Group

The observable Universe

Every child reading this has a different first five lines and exactly the same last six. Try writing the whole thing on a real envelope and posting it to yourself.

# The ladder, largest to smallest

Colour each step. Then read it aloud from the bottom up and see how far you get before it stops feeling real.

A light year is the distance light travels in one year: about 9.5 trillion kilometres.
